

18650 rechargeable lithium battery

What is a 18650 battery?

The 18650 battery is a lithium-ion cell classified by its 18mm x 65mm size, which is slightly larger than a AA battery. They're often used in flashlights, laptops, and high-drain devices due to their superior capacity and discharge rates. 18650s come in both flat and button top styles, and usually boast 300-500 charge cycles.

Are 18650 batteries good for flashlights?

Fast Order Shipping, Friendly Service, & the Best Value in Batteries! We sell a selection of size rechargeable 18650 batteries and 18650 battery chargers. These lithium ion 18650 batteries are commonly used in flashlights, as their high current provides more power and longer runtimes over other options.

What is a 18650 rechargeable lithium ion cell?

Look no further than the 18650 rechargeable lithium ion cell. These cylindrical powerhouses are quickly becoming popular in a variety of applications, from flashlights to electric vehicles. But with so many options on the market, how do you choose the right one for your needs?

Can 18650 batteries be charged with a smart charger?

18650 batteries can be charged with a compatible smart charger, while some feature a convenient Micro-USB or USB-C port. Replacement Sizes 168A, 18650, 19670, Protected 18650, Unprotected 18650 What are 18650 Batteries? The 18650 battery is a lithium-ion cell classified by its 18mm x 65mm size, which is slightly larger than a AA battery.

Are all 18650 batteries compatible with all devices?

It's important to note that not all 18650 batteries will be compatible with every device. Before making any purchases, make sure you check your device's specifications to ensure compatibility with your chosen battery model.

Do 18650 batteries have a charge port?

Batteries with a built-in charge port may be a valued choice for your average flashlight user because they are quick and easy to recharge. We recommend using a smart charger for those charging multiple 18650 batteries, as many allow you to check capacity and select different charge currents. How long do 18650 batteries take to charge?
