The C-Max Solar Energi uses 16 square feet of state-of-the-art, high-efficiency solar panels designed by SunPower, a solar energy firm in San Jose, Calif., but it still takes about a week of ...

El Ford C-Max Solar Energi tiene una autonomía de 620 millas (unos 1.000 kilómetros) y puede circular en modo totalmente eléctrico más de 21 millas (unos 34 kilómetros). Aunque

21 ford c max cmax c-max energi 24ah solar

monta los paneles solares en el techo, el resto del vehículo es idéntico al Ford C-Max Energi plug-in estándar. Como él, también se propulsa con un motor de ...

First, let's clarify something: the C-MAX Energi is a hybrid vehicle with a 300 Watt solar array on its roof. By itself, the panels won't provide nearly enough energy to move the car. Instead, the solar panels help recharge the CMAX Energi's 7.6 kWh Li-ion battery bank. Running only on electricity, the car has a feeble range of 21 miles ...

With a full charge, Ford C-MAX Solar Energi Concept is estimated to have the same total range as a conventional C-MAX Energi of up to 620 miles, including up to 21 electric-only miles. Additionally, the vehicle still has a charge port, and can be charged by connecting to a charging station via cord and plug so that drivers retain the option to ...

SunPower, Ford's solar technology partner since 2011, is providing high-efficiency solar cells for the roof of Ford C-MAX Solar Energi Concept. Because of the extended time it takes to absorb enough energy to fully charge the vehicle, Ford turned to Georgia Institute of Technology for a way to amplify the sunlight in order to make a solar ...

The trouble is, electric cars draw too much power and take up too small an area for solar roofs to charge them as they drive along. There are other possibilities though, one of which Ford is exploring with the C-Max Solar Energi concept--which uses solar power to directly charge the plug-in hybrid's battery pack.
