

2813 movement power storage time

How much does a 2813 Chinese movement cost?

This is a 2813 Chinese movement I bought at Startime Supply for US \$29.95. I believe it is the most popular movement inside the Replica watches and a very simple, cheap and reliable automatic movement.

Is a 2813 a slow rollover?

The only complaint (which is minor) is the time snaps over just past midnight, not exactly at midnight. It's not a slow rollover, just not exact. I don't really care about that, but wish to point it out for accuracy. Anyway, I generally have never had much luck with 2813's as they have always "acted cheap" to me.

How long does a dg2813 last?

All my DG2813 are running strong after 3 Years, original from factory; I'm no watchsmith, just a user:) Power reserve: because of the low beat movement the power reserve is longer than on the Asian ETA, it runs and runs and runs - well over 42 hours; Rotor: if it's loud: tiniest black oiler and tiny drop of Moebius 9010 or Novostar type B

Is the 2813 a Tongji movement?

Because of its ubiquity and low price, the 2813 is sometimes mistaken for what is known as a Tongji or Chinese Standard Movement. The 2813 is not a Tongji movement and is not based on the Tongji architecture. This movement is sometimes referred to as "A2813" - the A stands for Asia or Asian.

Is Eta 2813 a good movement?

The ETA 2813 is a 13 ligne 36000 bph movement. This movement is 11 1/2 ligne 28800 bph. It seems to be an update in which they increased the beat from 21600 to 28800. The older version was a relatively reliable movement based somewhat on the Miyota 8215, although the rotor seems to have been changed. Again this movement has nothing to do with ETA.

There are quite a few 2813-style Chinese movements floating around, but the "DG" indicates "Dixmont Guangzhou", one of the Late 1950's Chinese government run watch manufacturers (AKA - Guangzhou Five Goat Watch Factory), and they make some of the better Chinese movements.

DG 2813. DG 2813. Ranfft's page dedicated to this movement; This movement is not a clone of a Swiss movement. It is a Chinese movement that is very close to a Miyota 8215 without being a pure clone. Full movement Rotor moved to show the other side Focus on ...

The A2824 is a far superior movement to the 2813, and the genuine 2824 is a slightly better experience to the asian version. That said, the 2813 is a fine movement if you get a good one, longevity is a huge question mark but at least a year or 2 is fair to say. 2824 is a workhorse Asian or Swiss made, id always get one when possible.

Power-reserve should be at least 40 hours. The uni-directional winding gives a bit of ratchet noise but it does its job very effectively. Hand-winding feels like you're doing something wrong, but it should start with a shake anyway.
