I installed an Arlo Go 2 with an Arlo solar panel in June 2023. It worked for several months, although I did notice that the charge level would drop to below 90% until the solar charging would kick in. It would recharge to 100% in a day or 2 so this seemed unusual but was not really a problem. Ab...

The impacted camera is able to maintain a charge for >1 month if it's not plugged into the solar panel, so it has nothing to do with signal strength or activity levels. I contacted support to exchange the now destroyed battery, but the same panel seems to have the same effect on the replacement battery that was sent to me.
