The Clean Energy Finance Corporation (CEFC) and the Australian Renewable Energy Agency (ARENA) have also played an important role in helping developers obtain finance by directly financing projects and encouraging private investment. These agencies have directly invested around \$8.5 billion in clean energy-related projects since their inceptions.

Regardless, these types of companies are excluded from this list, leaving only renewable energy providers. But if you prefer to diversify through an ETF, one of the most popular choices is the Van Eck Global Clean Energy ETF, the first renewable energy-focused ETF to list on the ASX, which invests in the 30 largest clean energy stocks in the world.

The ETF has been designed to provide investors with exposure to the performance of an index, selected at the discretion of BlackRock, that is composed of companies that are involved in the clean energy sector or generate clean energy. The current index for the ETF is the S& P Global Clean Energy Index.
