

Backup battery to charge cell phones during power outages

Should you keep your cell phone charged during a power outage?

Your cell phone is an essential tool during an emergency. Here are some helpful tips to keep it charged during a power outage. While some might mock our society's reliance on cell phones, it cannot be understated how useful of a tool a modern smartphone can be during an emergency.

Can You charge a phone with a battery?

While it might seem counterintuitive to use one battery-powered device to charge another, it's better in an emergency if your phone (the device that can connect to a 4G network) has power instead of a device that requires a WiFi connection. Another efficient way to store battery power is through portable chargers or "power banks."

How to keep your mobile phone viable during a power outage?

Laptops and backup chargers are just two ways to keep your mobile phone viable during power outages. In our increasingly digital world, a mobile phone or other portable device is often a one-stop communication device. Phone calls, text messages, social media and even radio and television can all come from the same gadget.

Do you need a backup charging system during a storm?

When the power goes out during a storm, we rely more on our cell phones and smart phones to stay in touch with emergency responders, neighbors and relatives. Unfortunately, without a backup charging system, portable phones and mobile devices can be useless just when we need them the most.

What should I do if my phone goes out of power?

If your phone has the option, turn on "Low Battery Mode" (which should be accessible through the battery settings) and dim the brightness of your screen as low as you can go without straining your vision. And don't use your phone to play music or podcasts to pass the time during a power outage.

Should you prioritize your cell phone battery level during a power outage?

During an unexpected power outage, prioritizing your cell phone battery level isn't a sign you're addicted to social media. It's a vital part of emergency preparedness. The first thing you need to do when your power goes out is make sure your phone isn't using any more of its battery than it needs to.

If your electrical power is down, you have a couple of options to run your modem: either install a battery backup, or a power generator. Does a landline phone work in a power outage? Some cell towers have backup generators that provide ...
