

Battery backup power switch

What is a Tesla backup switch?

The Tesla Backup Switch is a crucial component of a Powerwall system that detects power outages and instantly switches your home to solar + battery power. All backup battery systems need a device like this (often called a "gateway") to safely disconnect your home from the grid and allow your solar and battery system to stay active.

What is a home battery backup?

They usually come in the form of power stations or solar generators. When an outage happens, these whole home battery backups can be used to power basic home appliances, such as fridges, microwave ovens, and so on. Besides, they can also charge your necessary devices like mobile phones and tablets.

What is a whole home backup switch?

Whole Home Backup by Design: Backup Switch is designed to be easily installed in your home's existing meter socket and to safely disconnect your home during grid outages.
