AGL has the second highest feed-in tariff rates at 15c/kWh. Here are some of the cheapest solar-specific deals from the retailers on our database.

What are solar feed-in tariffs?

Solar feed-in tariffs are arrangements where a solar system owner is paid for the solar energy that they send into the grid. At one point in time, feed-in tariffs were mandatory in every state in Australia, and the rates they offered were quite generous. Much has changed, however, since we first published this article in 2009.

Does a higher solar feed-in tariff mean a better deal?

A higher solar feed-in tariff rate from your electricity retailer does not necessarily mean a better overall deal - make sure that you consider each retail electricity plan as a whole. You can try our Solar-friendly Retail Plan Comparison Tool to get a more complete picture. At the moment, there is no mandatory minimum feed-in tariff rate in NSW.

What are solar feed-in tariff rebates?

Solar feed-in tariff (FiT) rebates - in conjunction with the savings from generating your own power - can dramatically lower your power bill and help you achieve a return on your investment faster. So if you have solar panels, it's important to factor in both the standard electricity rates and the solar feed-in tariff (FiT).

What is the difference between feed-in tariffs and other solar incentives?

The difference between feed-in tariffs and other solar incentives, such as the ITC, is that feed-in tariffs are a production-based incentive.
