How much do solar panels cost in Pakistan?

As of October 2024, the average solar panel price in Pakistan is between Rs. 28 and Rs. 32 per watt. This is the data of the end of September 2024, recorded at Rawalpindi/Islamabad. At the moment, the prices of solar panels have come considerably down compared to the beginning of 2023 when the prices hovered around Rs. 130/watt.

Why are solar panels so popular in Pakistan?

Pakistan has been having trouble with getting enough energy for a long time. One big reason is that we have to buy expensive oil to make electricity. This makes electricity bills high for people. But now, more and more people want to use solar panels at home and at work. Because they are cheaper and better for the environment.

Why are monocrystalline solar panels popular in Pakistan?

Monocrystalline solar panels are popular in Pakistan due to their impressive energy efficiency, which is a significant factor in solar installations. This high efficiency is a result of their unique manufacturing process, where they are made from a single crystal structure of high-purity silicon.

How many homes in Pakistan have solar panels?

Per Gallup Pakistan, around 20% of homes have installed solar panels on their homes in Pakistan (though not all of them are proper solar systems but just a panel or two). But that's an old survey. As of October 2024, more than 40% of homes have solar panels on their rooftops, even if they are just DC systems run by small solar panels.

How much does a 590 watt solar panel cost in Pakistan?

Trina Solar is another Chinese solar panel manufacturer and one of Pakistan's leading solar panel brands. Some people rely on Trina more than other brands mentioned above. The price of Trina Solar panels in Pakistan is around Rs. 32 per watt. So, you will have to pay around 19,000 to get a 590W Trina solar panel.
