In 2019, the world financed \$282 billion of renewable capacity, with onshore and offshore wind leading the way at \$138 billion followed by solar at \$131 billion. The success is attributable to ...

23 June 2015: Bloomberg New Energy Finance (BNEF) has published its New Energy Outlook (NEO) 2015, which is a long-term forecast of the global energy sector. ... The first of the five shifts is that declining costs of solar photovoltaic (PV) technology will result in a US\$3.7 trillion surge in PV investment. The second shift is one toward ...

The BNEF Summit has been convening leaders in energy, industry, transport, technology, finance and government since 2008, generating ideas, delivering insight, and making the connections that help them formulate successful strategies, capitalize on technological change and shape a cleaner, more competitive future.

o Getting on track for the power sector, means adding up to 505GW of new wind, 455GW of new solar and 245GWh new battery storage on average every year to 2030 under our Green Scenario. This is over 5.2-times the amount of wind capacity added in 2020, 3.2-times the amount of solar and 26-times the amount of battery storage.

WUXI, China, Feb. 10, 2015 /PRNewswire/ -- Bloomberg New Energy Finance (BNEF) has added Suntech to its Tier 1 solar company list in its February 2015 PV Market Outlook. BNEF has...

Solar power, once so costly it only made economic sense in spaceships, is becoming cheap enough that it will push coal and even natural-gas plants out of business faster than previously forecast.

Looking at the figures in detail, the biggest piece of the \$328.9bn invested in clean energy in 2015 was asset finance of utility-scale projects such as wind farms, solar parks, ...

Bloomberg NEF has been tracking clean energy investment globally for more than 10 years, across >100,000 deals and project records. ...
