

Because House loads are small on this boat, and because the existing wire harness is set up for a single power source, a Blue Sea Systems" m-Series Selector Battery Switch (6007) was installed. The Selector switch connects battery 1 for starting, battery 2 for running, or batteries 1 and 2 to all loads through a common circuit in the event of ...

Two AC source selection solutions are now available on Blue Sea Systems 360 Panel System: rotary switch and lockout slide circuit breakers. AC Source selection is important because many of today's pleasure boats have multiple AC sources--either or both 120V and 120/240V. There may be one or more shore power sources, and one or more generators.

Blue Sea Systems has developed an innovative battery charger to fit the needs of Fire Apparatus. The P12 is designed to prolong the life of the batteries to keep rigs on scene and out of the shop. ... Marine inverters in the US ground the neutral internally when they are supplying power and simply feed through the ground when shore power or the generator supplies the system. Therefore, to ensure a safe system, you must hook up six wires: the input hot, neutral, and ground, and the output hot, neutral, and ground.
