

# Buy power control systems

What is a Power Control System (PCS)?

With PCS, SunPower can increase the amount of solar and storage that can be installed with your home's existing main service panel. The PCS feature uses software to dynamically control solar and storage operation based on the main service panel rating. What are the Benefits of Power Control Systems? Having PCS functionality has two key benefits.

What types of controllers are available?

We offer different controller types and sizes to fit your specific needs. From the original programmable logic controller (PLC) invented in the 1970s to the scalable, multi-disciplined and information-enabled programmable automation controller (PAC), Allen-Bradley's control systems help you meet complex to simple application requirements.

Who is Power Systems Inc?

Since 1983, Power Systems Inc has provided customers with a dependable and competitive source of motion control products and systems.

Where can I find information about industrial automation & control products?

Contact your Customer Care Center for information about our automation and control products. Offer documentation, support information, certificates, CAD, software, and more. Access any of the 7000 pages from our Industrial Automation and Control offer catalogs quickly and easily.

Why should you choose power systems?

The benefit to Power Systems' service and solutions offering is removal of the need for multiple contractors-you can source hydraulic,pneumatic,process,electro-mechanical,and automation from one source,for ease,cost-efficiency and accountability. All of our services and solutions are administered by our highly-trained and specialized staff.

What is PCs operation control?

This operation control is required for compliance by the product certification(UL standard UL 1741 CRD). The technical answer: When PCS is active and there is a load imbalance between the phases,some of the home loads will be powered by the grid.
