

# California solar power tax

Does California have a solar tax credit?

No. In 2024, California does not have a state-specific solar tax credit. Instead, eligible Californians may qualify for the federal solar investment tax credit (ITC) equal to 30% of total system costs. 7. How does the California solar tax credit work?

What is the federal solar tax credit?

If you install your photovoltaic system before the end of 2032, the federal tax credit is 30% of the cost of your solar panel system. This is 30% off the entire cost of the system including equipment, labor, and permitting. Example: If your solar energy system costs \$20,000, your federal solar tax credit would be  $\$20,000 \times 30\% = \$6,000$ .

How much does a solar system cost in California?

The Residential Clean Energy Credit, formerly known as the federal investment tax credit (ITC), can reduce your solar panel system's cost by 30%. Your entire system qualifies for this incentive, including equipment, labor, permitting, and sales tax. The average cost for a 5 kW solar panel system is around \$11,585 in California.

Are there incentives for solar panels in California?

Several incentives, credits and rebates are available to all Californians who invest in solar energy systems. Other incentives in this list apply to multiple California counties or to lower-income energy customers. California is among 32 states that protect against property tax increases for homeowners who install solar panels.

Can I claim a solar tax credit if I owe taxes?

You can claim the federal tax credit once for the year you install a solar system. However, if the credit is more than the taxes you owe, it will roll over to the next tax year for up to five years. Under the Inflation Reduction Act, passed in August 2022, the federal solar tax credit is worth 30% of your total system cost.

Are solar panels tax deductible in California?

California doesn't offer a sales or property tax exemption, but it does provide an Active Solar Energy System Exclusion, which means your solar panel systems aren't assessed and don't result in higher property taxes. This exclusion is set to expire starting in 2025.
