

Can you put solar panels on a tile roof

Can I install solar panels on a concrete tile roof?

Some companies may tell you that you can't go solar or that they won't do the install, but that is not the case. If you have a concrete tile roof, there are two common ways to go about installing solar panels on a concrete tile roof. First, your installer can put S-hooks under the tile for your system to be mounted on.

How do I mount solar panels to my roof?

Here are some mounting solutions: Tile hooks: Tile hooks provide a direct attachment method for securing solar panels to the roof by affixing them to the roof tiles. This method is commonly employed on clay tile roofs-- requiring the installation of specialized hooks attached directly to the tiles.

Can solar panels be installed on a lightweight tile roof?

Chances are, you might've damaged a few of these tiles in the process because they are brittle and can break easily. Attempting to install solar panels directly on top of a lightweight tile roof is inadvisable. While they may hold up well against harsh weather, these tiles are not designed to withstand the stress of added pressure.

Should you drill a roof to install solar panels?

Drilling risks cracking the tile, which will only increase the overall installation costs of your solar panels. Instead, it's best to let your installer remove tiles, by drilling into your roof to attach mounting brackets to the studs and seal the area--just like they would do for any other style of roof.

Can solar panels be installed on clay-tiled roofs?

Until recently, installing solar on clay-tiled roofs has been a more expensive and risky endeavor than other roof types, like composite shingle or metal. This is because tiles are relatively expensive, fragile, and removing them to install roof mounts for solar panels can open up the seal of your roof to water damage. The old way of doing things:
