The Energy Central Power Industry Network[®] is based on one core idea - power industry professionals helping each other and advancing the industry by sharing and learning from each other. If you have an experience or insight to share or have learned something from a conference or seminar, your peers and colleagues on Energy Central want to hear ...

Lithium-ion utility-scale battery energy storage project in South Korea. Image: Kokam. Asia-Pacific will overtake North America as the biggest utility-scale energy storage (UES) market by annual installed gigawatts (GW) by 2024-2025, according to a new report by Guidehouse Insights, one to two years later than in the firm's previous forecasts.

Developer Arevia Power received a Record of Decision (ROD) from the US Department of the Interior for a US\$2.33 billion hybrid solar and storage project in Nevada. Claimed to be the biggest project of its type to date in the US state, it will pair 700MWac of solar PV with a 700MW battery energy storage system (BESS), the developer said on Tuesday.

The technology group W²sil² will supply an 8-megawatt (MW) / 32-megawatt hour (MWh) energy storage system to Colbun, one of the largest power generation companies ...

Energy Storage North America and Intersolar North America "Come Together" for the first time in person, connecting installers, developers, utilities, technology providers, policy makers, and key stakeholders from around the world to advance clean energy.

South America Energy Storage Market is poised to grow at a CAGR of 7.39% by 2027. Factors such as the declining prices of lithium-ion batteries with increased application range and increased demand for uninterrupted power supply are expected to drive the market growth.

Our mission at Energy Central is to help global power industry professionals work better. Our Power Industry Network[®] platform is built to help our members connect with each other, share their knowledge & experience and advance their careers in the industry. Membership is open to professionals working at utilities and organizations supporting the industry.

Our Latin America Energy Outlook 2023 - the first IEA outlook for the region - contains in-depth country and regional analysis of energy and climate trends, identifying opportunities and key ...

Energy storage will affect the entire electricity value chain across Latin America as it replaces peaking plants, alters future transmission and distribution (T&D) investments, ...

Select countries in Latin America. In 2020-2021, in response to the COVID 19 pandemic, governments in Select countries in Latin America have committed at least USD 18.37 billion to supporting different energy types through new or amended policies, according to official government sources and other publicly available information. These public money ...
