Are Chinese companies getting a share of solar?

The federal government is investing in solar. Chinese companies are getting a share of it. The federal government is investing in solar. Chinese companies are getting a share of it. Subsidies in the Inflation Reduction Act are meant to offset some of the costs of manufacturing solar panels in the United States. Rodrigo Arangua/AFP via Getty Images

Which Chinese companies invest in US solar equipment factories?

Here is a list of Chinese companies investing in U.S. solar equipment factories: Illuminate is a joint venture between Chinese solar equipment maker Longi (601012.SS) and U.S. clean energy project developer Invenergy. The company started producing solar panels at a five-gigawatt plant in Pataskala, Ohio in February.

Will Chinese companies build US solar panels?

Construction of U.S. solar-manufacturing plants by Chinese companies is also surging as they too seek to take advantage of U.S. incentives. Chinese companies will have at least 20 GW worth of annual solar panel production capacity on U.S. soil within the next year, enough to serve about half the U.S. market, according to a Reuters analysis.

Are Chinese companies getting subsidies to build solar panels in the US?

She spoke with "Marketplace" host Amy Scott about her story on Chinese companies receiving subsidies to set up factories in the U.S. and what it means for the domestic solar industry. Amy Scott: China has long dominated the solar panel business, but they're starting to build factories here in the U.S.

Are solar panels a good investment in China?

Solar panels typically must generate electricity for at least seven months to recoup the electricity that was needed to make them. Coal provides two-thirds of China's electricity at low cost. But Chinese companies are reducing costs further by installing solar farms in the deserts of western China, where public land is essentially free.

Why are Chinese solar panels making final assembly plants in the US?

This allows the shipments to avoid trade barriers, like tariffs imposed on many Chinese imports by President Donald J. Trump. Several of China's biggest solar panel manufacturers are building final assembly plants in the United States to tap subsidies offered as part of the Inflation Reduction Act.
