How much security is required for a solar plant?

There is no universal standard for the amount of security that is required to be posted. In most PPAs, the security is divided into construction period security and security from and after the date the solar plant achieves commercial operation.

Can a PPA be terminated if a solar project is unreliable?

D. Termination Rights. To protect against chronic problems at an unreliable solar plant, the PPA may allow the buyer to terminate the PPA if the output or mechanical availability of the project is below a stated minimum for a certain number of years. VIII. Curtailment and Force Majeure. A. Curtailment.

Do utility PPAs have a mechanical availability guarantee?

Mechanical-availability guarantees had become rare in utility PPAs where the utility had RPS obligations to satisfy, but they are standard in PPAs where the offtaker is a corporate or industrial user, due to accounting issues that cause these offtakers to prefer an availability guarantee over an output guarantee. C. Liquidated Damages.
