What is Jinko's new 610 W Tiger pro tr solar module?

Jinko's Tiger Pro module. Chinese PV module maker JinkoSolar unveiled its new 610 W Tiger Pro TR solar modules on Saturday at the SNEC PV Power Expo in Shanghai. The manufacturer said that the new panels are based on its n-type TOPCon monocrystalline cell tech, which boasts a 24.79% conversion efficiency rate.

Why should you choose a n-type solar module?

30-year lifespan delivers 10-30% more power compared with conventional P-type modules. The natural lack of LID in the N-type solar LID cell can increase power generation. Excellent low irradiance performance. Better light trapping and current collection to improve module power output and reliability. Industry-leading, lowest thermal coefficient.

Does Dah solar offer a full-screen PV module?

DAH Solar innovates the full-screen technology and applies it to our PV modules. With this technology, the sedimentation of dust, water, and snow will decrease, which enhances the power generation by 6-15%. Please get in touch with our Customer Services Specialist to get more information about our global patent product the Full-Screen PV Module. Q5.

Does the frameless design affect the reliability of a PV module?

Q5. Does the frameless design affect the reliability of the module? The Full-Screen PV Modules have better reliability than regular modules due to their unique and innovative structural design. The Full-Screen PV Modules have excellent waterproof performance (IP68) and mechanical load performance (front 5400Pa, the reverse side 2400Pa).

How much power does a BIPV module have?

In addition to the new 610 W panels, the company also presented a new BIPV module series with power output of 550 W. Its new "PV +Architecture" line is available in different colors and levels of translucence, the manufacturer said, without revealing any other product details.
