

Electric stool can be used as a bed

This Medline Full Electric Hospital Bed features a full metal frame base with caster wheels so the bed can be easily moved from one location to another. The casters lock in place so there is no risk to the user when getting in and out of bed. The frame is also designed with best practices in mind; such as eliminating injury and pinch points.

As we age, our range of mobility begins to see a lot of changes. Some seniors may have difficulty climbing stairs, getting in and out of the bathtub, car, or even in and out of bed. A perfectly healthy senior will also inevitably begin to experience certain changes that are likely to affect their mobility. The CDC reports that falls cause more than 95% of hip fractures in the ...

Medical Stool: The ergonomic backrest offers height & extension adjustment allowing maximum seating area & comfort; can be adjusted up and down and in and out to provide just the right back support. Comfort and durability are provided through the use of high-density memory foam, high-grade faux leather upholstery, and bead-less upholstery seams.

Getting in and out of bed can be a pain, especially if you have a tall bed. A stool helps you safely enter and exit the bed by giving you a boost and a non-slip surface to use to exit the bed as well. Falling out of bed is a serious issue and having a bed step stool can be a critical addition that prevents these types of incidents from occurring.

An adjustable bed is a motorized bed base that can move into different positions by raising the head and/or foot of the bed. Some also have other features like built-in massagers and lighting.
