Enterprise-Grade Liquid Cooling Solutions. When analyzing liquid cooling options for enterprise-grade IT hardware there are essentially two main categories of liquid cooling - Direct-to-Chip Liquid Cooling (sometimes called conductive or cold plate liquid cooling) and immersive liquid cooling.

The cold plate is enabled with liquid supply and return channels, allowing technical cooling fluid to run through the plate, drawing heat away from the chip. This allows direct-to-chip-enabled servers to be installed in a standard IT cabinet just like legacy air-cooled equipment, even while being cooled in an innovative way.
