

Can liquid cooling plate be used for EV battery thermal management?

In this paper, an innovative liquid cooling plate (LCP) embedded with phase change material (PCM) is designed for electric vehicle (EV) battery thermal management. The proposed cooling plate is named "hybrid cooling plate" as it takes advantage of both active (liquid) and passive (PCM) cooling methods.

What is a liquid cooling plate embedded with PCM?

A novel liquid cooling plate embedded with PCM for battery thermal management. The cooling plate provides a modular solution for battery cooling with PCM. The cooling plate is 36% lighter than an aluminum cooling plate of the same size. Up to 30% reduction in pump energy consumption is achieved by the new cooling plate.

What is a cooling plate?

Cooling plates play a pivotal role in ensuring the efficiency, safety, and longevity of high-power battery systems. However, the manufacturing process of these components is intricate, involving multiple advanced techniques to meet the specific requirements of different applications.

Can a hot silicon plate be used as a liquid cooling system?

Therefore, Wang et al.<sup>140</sup> have developed a new liquid cooling strategy based on the hot silicon plate. The excellent thermal conductivity of the silicon plate, combined with the good cooling effect of water, has formed a feasible and effective composite liquid cooling system in long-cycle tests.

Can liquid cooling plate be used for thermal management of Li-ion batteries?

Conclusions and future work This paper presents a new concept of the liquid cooling plate for thermal management of Li-ion batteries in electric vehicles. In the proposed cooling plate, a phase change material is embedded inside the cooling plate.

Does a cooling plate reduce pump energy consumption?

Up to 30% reduction in pump energy consumption is achieved by the new cooling plate. The cooling plate provides a heating solution for batteries in cold temperatures. In this paper, an innovative liquid cooling plate (LCP) embedded with phase change material (PCM) is designed for electric vehicle (EV) battery thermal management.
