

Energy storage product insurance coverage

Why do you need energy storage insurance?

Your balance sheet is strengthened, as the right cover reduces your insolvency risk and the risk of serial losses. The contract cannot be terminated by the insurance company - your protection will stay in place no matter what. And you only pay once for the entire compensation period. Start your energy storage success story.

Why do you need warranty insurance for your energy storage system?

Our warranty insurance solutions help to secure your sustainable business in the long run. Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more.

How long do energy storage systems last?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a manufacturer and system integrator you have to provide your customers with warranties.

Why do we need energy storage systems?

Energy storage. Safe and sound. Energy storage. Safe and sound. Renewables like wind and solar energy are intermittent by nature. To successfully transition to an increasing percentage of renewable energy, we need energy storage systems that provide the necessary supply stability.

What are some examples of energy storage systems?

For example, capacity per unit is not standardised, and is growing on the back of commercial pressures; gravity energy storage systems are now part of the mix, as well as lithium-ion and vanadium technology, and multiple use cases such as grid balancing and stability, or reactive power and load shifting, are common.

What happens if your energy storage system fails?

Energy storage systems often involve the complex integration of multiple high-tech components. These are all prone to failure and malfunction, particularly over long periods of ten years and more. As a consequence, a serial failure event can cause high cumulative warranty claims and jeopardise your balance sheet.
