What is the European Photovoltaic Industry Association (EPIA)?

The European Photovoltaic Industry Association (EPIA) is the world's largest industry association devoted to the solar photovoltaic (PV) electricity market. The association aims to promote PV at national, European and worldwide levels and to assist its members in their business development in both the European Union and export markets.

What is the EU solar photovoltaic industry alliance?

The EU Solar Photovoltaic Industry Alliance will bring together industrial actors, research institutes, consumer associations, NGOs and other stakeholders with an interest in the solar PV sector.

What is the European photovoltaic solar energy conference & exhibition?

Welcome to the 41st European Photovoltaic Solar Energy Conference and Exhibition. The innovation platform for the global PV solar sector.

What is the European Solar Alliance?

The Commission officially endorsed the alliance on 11 October 2022. It aims to scale up the manufacturing capacity of innovative solar PV products and components in Europe and provides a framework for coordinating in areas such as innovation and technology, supply chain, access to finance, circularity, regulation and skills.

Thomas Courbe, DG of the French Directorate General for Enterprise, said, "The development of solar energy is essential to achieving our European climate objectives and it will only be possible if we rebuild a European photovoltaic industry. Europe has all the assets to build its strategic autonomy in this field, by supporting innovation and ...

ESMC"s Holm told pv magazine that his association strongly favors European PV manufacturers and the overall industry, and SolarPower Europe "could" align itself with these values. At the end ...

The competitiveness of European industry and its interdependent relationship with decarbonisation sits at the centre... Read More The new Academic Year of the EUREC Masters kicked-off last week in Brussels, with 3 successful events!

On 9 December 2022, the European Commission launched the European Solar Photovoltaic (PV) Industry Alliance at a high-level conference in Brussels. EU Internal Market Commissioner Thierry Breton hosted the conference and formally presented the alliance, followed by opportunities to discuss the main issues the alliance will address.

The European Heat Pump Association's (EHPA) recent two-day event in Brussels came as heat pump sales across 13 European countries fell 47% year on year. Attendees discussed how policy and the ...

SolarPower Europe, the premier association for the European solar PV sector, unites 320+ organisations. Collaborating with members, we shape regulations and business landscapes for solar's growth. ... Based in Brussels, we build strong relationships, ensuring solar's pivotal role in the European energy transition. As co-founders of the RE ...

Since its creation in 1985, EPIA - the European Photovoltaic Industry Association - has experienced great changes and challenges. Just like the solar photovoltaic (PV) industry. Only a niche market a few years ago, PV is now becoming a mainstream electricity provider, changing the way the world is powered.

Solar industry leaders gathered in Brussels this week for the Annual General Meeting of the European Photovoltaic Industry Association (EPIA). The goal: identify challenges to solar PV growth and decide on ways to overcome those in order to keep advancing solar power across the continent.

SolarPower Europe (former European Photovoltaic Industry Association or EPIA) represents members active along the whole solar photovoltaics (PV) value chain: from silicon, cells and module production systems development and PV electricity generation as well as marketing and sales. SolarPower Europe is a founding member of European Renewable ...

The European Photovoltaic Industry Association (EPIA) is a global group aimed at promoting PV. The Association is dedicated to the solar photovoltaic (PV) electricity market and is the largest organisation of this kind in the world. It is based in Brussels in the Renewable Energy House, a place where all associations involved in renewable energy are gathered.

Calls for help from the European solar industry have been piling up since last summer. "If nothing happens now, there is a great risk that European solar producers will face massive problems in the coming months, some will even go bankrupt," warned 40 European solar companies in an open letter to Brussels in mid-September 2023.
