How much does a smartflower solar panel cost?

Now, let's talk about the numbers. How much does the SmartFlower cost? Before applying for all incentives and tax credits, the SmartFlower solar panel system ranges in price from \$25,000 to \$30,000 with the average cost to install at \$27,000. There are two models that you can choose from, and this is why the price can vary.

What is a smartflower Solar Flower?

The Smartflower solar flower is an all-in-one ground-mounted solar system with a tracker that follows the sun. However, it doesn't look like the solar panels you might be used to. Learn all about the product, how it compares to other solar options, and whether you should consider one for your home in our Smartflower solar review.

Does a smartflower produce more electricity than a solar panel?

Thanks to this tracking capability, the Smartflower can produce significantly more electricity than a similarly-sized rooftop solar panel system - up to 40 percent more, according to Smartflower's website.

How does smartflower solar work?

The system's 12 solar panels are self-ventilating, which cools their surfaces and delivers more output and efficiency than traditional roof-mounted solar. SmartFlower's all-in-one system installs in the ground by trained professionals in about four hours and is portable, so you can take it with you if you move.

Where is smartflower Solar Flower installed?

However, it has been installed at a handful of U.S. houses and organizations like the Detroit Zoo and Mary Baldwin University. The U.S. division of Smartflower is currently based in Boston, Massachusetts. How is the Smartflower solar flower different from other solar options?

How many kilowatts is a Solar Flower?

The 12-petal, 194-square-foot structure comes with 2.5 kilowatts (kW) of electricity production, roughly equivalent to a 3.5 to 4 kW fixed rooftop array. While there is currently just one solar flower version available in the U.S., the Austria-based company has plans for two additional models with new features.
