How long does it take a lotus seed to grow?

They will need to be moved to a larger container as they grow. **How Long Does It Take For Lotus Seeds To Grow And Bloom?** On average, lotus seeds take approximately 4-6 weeks to germinate and 2 years to mature and produce blooms. However, this can vary depending on environmental factors and the specific variety of lotus.

How to get fresh lotus seeds?

Ensure that the seeds are plump, firm, and free from any signs of damage or mold. The best time to acquire fresh lotus seeds is when lotus plants are in bloom. As mentioned earlier, the hard seed coat of lotus seeds hampers water absorption and germination. To overcome this barrier, scarification is required.

How much does a lotus seed cost?

Dried and fresh Lotus nuts or seeds are available for sale both in stores and online. However, fresh seeds are not as available in markets as the dried ones except for the areas where lotus is cultivated. The price range for 8 ounce of these seeds varies from \$15 to \$20.

You can see why maintaining this standard consistently can be tricky. It's easier simply to store your seeds in the fridge or freezer. Keep in mind that frost-free fridges and freezers work by drawing out moisture, and can seriously dry out seeds. However, as long as your seeds are in appropriate containers, they shouldn't become damaged.

Since bacteria and other pathogens can't really grow where there is no water, dried seeds and other dried items will remain safe to eat for quite a while. However, how tasty they will be depends on the quality of the seeds.
