

# How much does it cost to move solar panels

How much does it cost to remove solar panels?

The national average cost for removing 14 to 16 solar panels for a 1,500 sq.ft. roof is between \$2,800 and \$4,800. Most people pay around \$3,800 to remove, disconnect, and reinstall 15 panels after the roof is replaced. At the low end of the spectrum, however, you can opt only to have 15 solar panels disconnected and removed for \$1,500.

What is the cost to move solar panels?

The cost to move solar panels (removal, disassembly, packing, shipping, and reinstallation) can range from \$4,000 to \$8,000, depending on the size of the system and the distance to the new home. Besides, you need to cover the cost of repairing the roof of your old home where the panels were originally fitted and the cost of any required permits.

How much does it cost to move roof panels?

Moving the panels themselves costs between \$4,000 and \$8,000, depending on the size, complexity, and how far you're moving. This includes the cost of removing the panels, packing them safely, shipping them to your new home, and reinstalling them. Patching and sealing your old roof costs between \$500 and \$1,000.

How much does it cost to install solar panels on a roof?

The cost of a dual installation of solar panels and a roof is a large purchase for most homeowners. According to the National Renewable Energy Laboratory (NREL), the average installation cost for a residential rooftop solar array alone is \$19,000. If the solar array is installed simultaneously with a new roof, the average is \$25,000.

How much does it cost to reinstall solar panels?

Reinstalling solar panels accounts for the larger share of costs. On average, the cost to uninstall and reinstall is between \$3,000-\$5,000. The price is subject to factors like roof pitch and roof accessibility, as well as the number of panels installed, so it could fall outside of that range for large panel systems or systems on difficult roofs.

Can I move my solar system to a new home?

It's best to use the same company that originally installed your solar panels when moving your system to a new home. The experienced solar technicians from the company will know how to safely remove, transport, and reinstall the solar panels in the most efficient way possible.

NREL found that in 2022 solar panel installation labor cost made up around 5% of the total cost of residential solar projects and the cost of the solar panel modules makes up around 18%. So, if the calculator gave you a lifetime energy cost of \$26,099 for a cash purchase, you can estimate that installation labor will make up
