

What is the International Solar Energy Society?

Published since 1957, Solar Energy, the official journal of the International Solar Energy Society is devoted exclusively to the science and technology of solar energy applications. With participation encompassing 100 countries, ISES serves as a center for information on research and development in solar energy utilization.

What is the Solar Energy Society?

Through its publications and its sponsorship of technical conferences, the Society provides a world forum for the active consideration of solar energy. Solar Energy welcomes manuscripts presenting information on any aspect of solar energy measurement, research, development, application, or policy.

What is ISES Solar World Congress 2021?

The first ever fully virtual ISES Solar World Congress was held online from 25 - 29 October 2021. Throughout the 5-day event, SWC 2021 featured 31 technical sessions, 14 keynote speeches on the status and trends of specific technologies, 11 plenary sessions and special events, and 6 topical forums.

What is solar energy?

The term "solar energy" in this context includes the indirect uses such as wind energy and biomass. Because of the international character of Solar Energy, articles that deal solely with the solar radiation or wind data base of a specific country are not normally considered suitable for Solar Energy.

What is a solar energy manuscript?

Solar Energy welcomes manuscripts presenting information not previously published in journals on any aspect of solar energy research, development, application, measurement or policy. The term "solar energy" in this context includes the indirect uses such as wind energy and biomass.

Where can I find the Solar Energy Journal?

For libraries, the Journal is available directly from the publisher (journals.elsevier.com/solar-energy/). Prices vary from region to region. All subscriptions are for personal use only and may not be shared or placed in institutional or university libraries or other libraries, nor may any personal subscriptions be used for library purposes.

To maintain close working relations with other solar energy societies such as the American Solar Energy Society, and the International Solar Energy Society, as its official Canadian section, and environmental groups (nationally and internationally) on matters of common concerns;
