The 2022 U.S. Energy and Employment Report found that Iowa had an estimated 83,599 energy workers (5.6% of total state employment), which includes 18,864 workers employed in energy efficiency. In 2021, Iowa ranked 30th nationally for clean energy jobs, with approximately 28,953 Iowans employed by the industry.¹

In 1983, Iowa became the first US state to establish Renewable Portfolio Standards, and met its target of 105 MW renewable energy generation capacity in 1997 (NREL 2013). At the federal level, there are 16 active programs, including four geared towards utility-scale solar energy systems in the form of grants and green power purchasing options.

Realizing Iowa's biomass potential can also have positive employment benefits for the state. Ethanol production alone in Iowa currently supports over 15,000 jobs (Source: Iowa Renewable Fuels Association, 2018). In January 2017, with financial assistance from the U.S. Department of Energy's (DOE) State Energy Program, the Iowa Economic ...

Iowa ranks among the top 10 states in total energy consumption per capita, mainly because of its small population and large industrial sector, which includes agriculture. ^{11,12} The industrial sector leads Iowa's end-use energy consumption, accounting for slightly more than half of the state total. ¹³ Iowa is among the 10 states with the most total industrial sector energy ...
