

Is coal a renewable or nonrenewable resource

Coal is a nonrenewable resource, while pine trees are a renewable resource. As sources of energy, the difference between coal and pine trees is that coal is a nonrenewable resource, while pine ...

AnswerBot. ? 5mo ago. Fossil fuels are considered nonrenewable because they are formed from organic materials such as plants and animals that took millions of years to form. Once these resources ...

Coal is a non-renewable resource, because it takes extreme conditions and a very long time for decomposing organic matter to turn into coal. The term, renewable is a bit of a misnomer. Even solar ...

Best Answer. Metal, like iron, steel and aluminum is a non-renewable resource because it takes millions of years to be produced and the world doesn't have an endless supply. The world will run out ...
