

# Japan's power storage project bidding

How many battery energy storage projects have won a bid?

Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan. A total 1.67GW of projects won contracts, including 32 battery energy storage system (BESS) totalling 1.1GW and three pumped hydro energy storage (PHES) projects totalling 577MW.

Are battery storage projects eligible for competitive power auctions?

Containerised battery storage units at a project in Hokkaido, northern Japan, where grid operator's rules require renewable generators to add storage. Image: Sungrow. Energy storage projects will be eligible to take part in competitive capacity auctions for low-carbon power set to be launched this month by the Japanese government.

Will HDRE build a new energy storage system in Japan?

Jason Chou, General Manager of HDRE, outlined the company's ambitious plan to build 1.5GW of energy storage systems in Japan over the next three years, involving a capital investment of approximately NT\$50 billion.

Is Japan's battery storage market a 'modest' market?

As has been widely covered by media including Energy-Storage.news, Japan's battery storage market has been attracting investment over the past couple of years from domestic and international entities, albeit at a growth rate which might also be called 'modest' compared to some other national markets.

Tokyo utilities put home battery storage in Japan's power supply-demand adjustment mix. September 5, 2024. ... Over a gigawatt of bids from battery storage project developers have been successful in the first-ever competitive auctions for low-carbon energy capacity held in Japan.

It is Eku Energy's first project in Japan to reach financial close and will be located in Miyazaki City, the capital of Miyazaki Prefecture on the southern island of Kyushu. The 30MW asset will be 4-hour duration (120MWh), and a 20-year offtake agreement is in place with Tokyo Gas. Eku will own the project, with Tokyo Gas having full operating rights for the term of ...

Gurin will build and operate the plant, using lithium iron phosphate (LFP) lithium-ion (Li-ion) batteries. The BESS equipment will be supplied by Japan's Toshiba Mitsubishi - Electric Industrial Systems Corporation (TMEIC), while engineering consulting services by another Japanese company, Nippon Koei Energy Solutions. Marking Gurin Energy's entry into ...

CATL, its CHC Japan partners and Shikoku Electric Power become the latest big names to spot the potential for a battery storage market in Japan: last week, Idemitsu Kosan, the country's biggest petroleum producer,

# Japan's power storage project bidding

announced its first lithium-ion (Li-ion) BESS project, preceded a few days before by utility Sala Energy ordering a 69.6MWh sodium ...

"Japan's sheer size and reputation, the establishment of the organisation and infrastructure, everything attracts lots of companies," Behrengard said, but noted that the number that succeed once there is relatively small. ... On the technical side, getting grid connections for battery storage projects can be a challenge in many countries ...

Japan's first competitive auctions for low-carbon energy capacity witness over a gigawatt of battery storage projects securing contracts, ... the groundbreaking "Long-term Decarbonisation Power Source Auction" concluded with the announcement of results at the end of April. These auctions offer 20-year fixed revenue capacity market contracts ...

Singapore-based Gur'n Energy has unveiled plans to build, develop and operate a two gigawatt-hour battery energy storage system (BESS) project in Japan. With 500MW of capacity, the project will be the first that Gur'n will develop in the country. ... South Africa invites bids for 7.6GW of new power generation.

Japan's first auction for long-term zero emissions power capacity has attracted strong bidding interest with a plan to install battery storage, as investment in the power storage system is ...

These projects, which began operating in June 2023, mark a significant milestone as Japan's first large-scale grid connected ESS facilities involved in market bidding.\* The ESS facilities have been specifically designed to enhance the stability of the power grid by providing ancillary services, capacity services and energy arbitrage.

growth of renewable energy . Storage technologies hold promise as part of the solution to these issues and present a potentially significant new business opportunity for energy investors in Japan. ENERGY STORAGE IN JAPAN Some of the more recent new-build renewable power plants in Japan include an energy storage component.

The facility in Kirishima, Kagoshima Prefecture, is JPN ENERGY's first BESS project. (Image: JPN ENERGY Integrated System) JPN ENERGY Integrated System commissioned its first grid-scale battery storage facility and established Kirishima Chikudensho LLC, a joint venture with GreenEnergy& Co and DMM , that will own and operate the ...

Projects that have been approved for the FIT scheme can apply to transfer to the FIP scheme when their business plan is approved. For the 2022 financial year, solar power projects with a capacity of at least 50kW that are not subject to auction receive JPY10/kWh under the FIP scheme.

"There are certain major milestones to hit until a utility scale battery energy storage system is ready to support the grid and be a major contributor to the #energytransition. Financial close is certainly one of those," the

# Japan's power storage project bidding

developer posted. As reported by Energy-Storage.news in April, the company's Hirohara BESS project will be a 30MW/120MWh (4-hour ...

A total of 1.67 gigawatts (GW) of projects emerged victorious in the bidding process, with 32 battery energy storage system (BESS) projects securing contracts totaling ...

Pursuant to an amendment to the EBA, which came into effect as of 1 April 2023, Stand-alone SB Facilities are treated as independent "power generation facilities" (note that a storage battery ...

Moving Forward While Adapting . According to statistics from the CNESA global energy storage project database, by the end of 2019, accumulated operational electrical energy storage project capacity (including physical energy storage, electrochemical energy storage, and molten salt thermal storage) in China totaled 32.3 GW.

In Japan, the extension of subsidies to stand-alone battery storage facilities affirms the Japanese government's commitment to transition to renewable energy. It is expected that the introduction of stand-alone battery facilities will ease grid related issues and mitigate connection related risks faced by renewable energy projects.

Launched in January, the new "Long-term Decarbonisation Power Source Auction" hosted by the country's national association of grid operators, OCCTO, concluded with the announcement of results at the end of last month (30 April). Up for award were 20-year fixed revenue capacity market contracts with utility companies for non-emitting power resources. ...

2 &#0183; Developing offshore wind projects is a critical component of Japan's transition to renewable energy. On July 19, 2024, at 5:00 p.m., Japan's third round offshore wind auction covering two "promotion zones" off the coast of Aomori and Yamagata prefectures closed for bids. The results are expected to be announced in December 2024.

Indonesia's state-owned, vertically-integrated power utility, PT Perusahaan Listrik Negara (PT PLN) has launched a two-envelope bidding process without prequalification for the design, supply, installation, testing and commissioning of pump-turbines, generator-motors and auxiliary equipment for the 1040 MW Upper Cisokan pumped-storage hydropower project, ...

Speakers: Shunsuke Kawashima, deputy general manager, Itochu Corporation Ross Bennett, managing director and head of structured finance, NORD/LB Joost van Acht, managing director, ib vogt Dr Mahdi Behrangrad, head of ESS/VPP business development, Pacifico Energy Nick Morely, APAC technical lead, Eku Energy Drivers for energy storage in ...

The partners have jointly invested in the business and their first project will be a 15MW/48MWh lithium-ion battery energy storage system (BESS) asset in the coastal region of Himeji, in Hyogo Prefecture, just southwest of the major cities of Osaka and Kobe. RENOVA said the launch came after a financing deal was

agreed with SMFL Mirai in June. Construction on ...

Japan-based energy market consultancy Shulman Advisory wrote on its corporate blog last week (12 January) that power generators will bid using specific bidding units per kilowatt per year to contract with retail electricity providers to sell them power over 20-year terms from new-build capacity. This, Shulman Advisory said, would give successful generators ...

Japan has seen a spate of storage battery projects announced in recent months. Many seek to take advantage of state subsidies as central and local governments push for more renewables. The goal is to encourage the installation of batteries to help the grid cope with more weather-reliant generation in the system.

Japan's first auction for long-term zero emissions power capacity has attracted strong bidding interest with a plan to install battery storage, as investment in the power storage system is gaining momentum in line with expanded use of fluctuating renewable energy sources. Japan's first auction for long-term zero emissions power capacity has ...

The Chilean Ministry of Energy has opened a public land bidding auction seeking 13GWh of standalone energy storage projects. In coordination with the Ministry of National Assets, the programme aims to allocate energy storage capacity across four regions - Arica and Parinacota, Tarapaca, Antofagasta and Atacama.

The Megapack installation is based on Tesla's integrated solution which includes lithium-ion (Li-ion) batteries, power conversion system (PCS, described as "power conditioner" in Japanese industry parlance), thermal management and controls. It is listed as available in Japan in 2-hour duration (1927.2kW/3854.4kWh) and 4-hour duration (979.2kW/3916.8kWh) ...

CHC Global's local subsidiary, CHC Japan, has in turn started a new JV focused on developing and operating energy storage system (ESS) facilities with Shikoku Electric Power. The utility is responsible for providing electricity on Shikoku, an island just southwest of the major cities of Osaka and Kobe. Shikoku houses four prefectures, and while the smallest of Japan's ...
