# Jinneng holding moroni energy storage project

(Bloomberg) -- A Chinese energy firm has broken ground on an enormous 55 billion yuan (\$7.7 billion) project in Shanxi province combining wind turbines, solar panels and battery storage in an old coal mining area. State-owned Jinneng Holding Group Co. Ltd. started construction on the project Friday, according to a report from Shanxi Daily.

In order to maintain the balance between supply and demand in the market, Jinneng holding group recently issued nine measures to maximize the release of advanced coal production capacity and give priority to the supply of power plants in urgent inventory. On the premise of ensuring safety in production, Jinneng holding group made every effort to increase ...

Reports indicate the state-owned utility intends to invest CNY23 billion (US\$3 billion) in the hybrid plant, set to come online in 2021 and produce 400,000-500,000 tonnes of hydrogen per year.

Recently, Jinneng Clean Energy Technology Co., Ltd. (hereinafter referred to as "Jinergy") won the bid of a 300MW "New energy+ energy storage" project in Quwo County. This project is under orderly production and shipment. The products involve in the bidding are the dual-glass monocrystal 144-piece 540W and 545W photovoltaic modules.

Adopting the world's first-class equipment, introducing global technology, and creating the development mode of circular economy, JINNENG plans to build a series of projects of 480,000 tons of green carbon black, 2 million tons of high-performance polypropylene, 1.8 million tons of propane dehydrogenation, and comprehensive utilization of ...
