With @LebanonJon, VP Storage Chia Networks, leaving the company, in my opinion they have lost one of the true driving forces behind the Chia blockchain. Every serious farmer knows who this guy is. He will make himself available as an advisor for Chia Network's circular drive initiative. I'm shutting my farm down and may buy XCH if/when it hits \$5 for long ...

Define energy storage as a distinct asset category separate from generation, transmission, and distribution value chains. This is essential in the implementation of any future regulation governing ESS. ... Lebanon 12% of generation mix by 2020, 30% by 2030 2020 & 2030 7% of installed capacity Egypt 20% of electricity generation by 2022, 42% by ...

Fill the energy gap and reduce Lebanon's current energy dependency on the external markets. Develop an indigenous & diversified energy that will support economic growth. Ensure that non-renewable energy resources benefit current and future generations. Establish financial instruments (eg. Sovereign Wealth Fund) that preserve wealth

Quick Cost Reduction. To reach its 50% green energy target by 2030, Lebanon must build around 6 GW of wind and solar plants. By exploiting Lebanon's potential for clean pumped hydro-storage, integrating battery storage or selling our excess electricity to Syria, Lebanon could reach such objectives faster and integrate more renewables into its energy sourcing.
