As gatekeepers of productivity and safety, ball valves bear the responsibility of regulating flow, withstanding high pressures and temperatures, and offering reliable shut-off capabilities. Despite their significance, maintenance on ball valves is often overlooked, leading to decreased efficiency, potential system failures, and costly downtime.

Our offering also includes throttle valves and flanged ball valves. Our focus on material excellence and a broad selection of different types of valves make Hitachi Energy your partner of choice . Key Features. Available in throttle valves NW80, with short or long lever, and ball valves without flange, with single or double flange

Ball valve series HFKH650 for hydrogen transport, storage and refueling systems up to 650 bar. Higher compression of hydrogen during transport and storage improves the efficiency of the systems, saves installation space and, last but not least, reduces costs. Considering the temperature influence, State of the Art Type 4 Technology Cylinders are designed for ...

Trunnion-mounted ball valves represent a cornerstone in the safety and efficiency of natural gas storage facilities. They are essential infrastructure elements because ...

Sern Ball Valves (SBV) state-of-the-art valves are assembled to order and can meet all major operating company standards. Building a long standing relation with our industry, SBV place quality and customer satisfaction as the keystone of our mission.

Safe Energy Systems would be happy to assist you in the selection of various Industry Standard valves to suit your process requirements, offering you solution based approach to your process and safety problems, in sizing and supplying appropriate valves from our European/India made product ranges for safe operation of your plant and equipment.

Additional safety barrier with high closing force. The single-ball safety valve is a fully open downhole safety valve that is run in the open position and closes permanently when the disk is ruptured. The operator mandrel is balanced to internal pressure and is locked in the open position to prevent premature closure.

T-580-70-SV - Two-Piece Bronze Ball Valve - Safety Vent[®]; for Compressed Air Lines Ball Valves. The NIBCO[®]; Safety-Vent[®]; feature provides air exhaust capability while holding full upstream pressure in a closed position. The bronze ball valve provides ease of operation with quarter-turn (90 degrees) open to close, and bubble-tight shutoff at ...

Our Kelly V alves according to API 7-1 are used as safety valve in the drilling rig. Technically, they are characterised by a wide temperature range from -46°C to +180°C (L/X), class 2 as standard and by their longevity and resistance to higher differential pressures. Hartmann Kelly Valves are available in different lengths, outside and inside dimensions and thread types.

Under extremely low temperatures and in the harshest of environments, Habonim's cryogenic ball valves consistently exhibit high flow capacity, tight shut off, energy efficiency and long life ...

The calculation shows that the use of a 12-in. AWWA ball valve in the place of a 12 inch silent check valve can save \$2,762 per year in energy costs. If the pump station had four such valves operating for forty years, the total savings will be \$442,000 over the life of the plant.

Ball valves are commonly used in drinking water and gas applications. Water: The ball valves are used in water applications for flow and pressure control. For drinking water application, the valve must be WRAS, KIWA or DVGW approved. Two-Way Drinking Water Ball Valve. Gas: These ball valves are also used in gaseous application. They are used ...

Three-piece ball valves composed of 3 separate pieces held together by bolts. A three piece ball valve is preferred wherever regular cleaning is required. The ball valve ends can remain threaded into the pipe, while the center section can be removed. A butt weld ball valve contains a butt weld-sized connection for inlet and outlet connection.

Our comprehensive valve offering provides for each type of gas turbine an ideal solution with Neles(TM) butterfly valves for blow off application, blade air cooling application and for fuel gas trip valves application. On the fuel gas control valves application, Neles control valves provide the highest rangeability and control accuracy.
