M.Power recently released their Triple Diamond Sharpening Station that features three diamond stones and three leather covers for stropping. It's a capable system but could it possibly be a one-stop shop for woodworkers? Watch the review to find out. If you like what you see, consider purchasing the sharpening station through our Amazon link.

The FASTTRACK Precision Sharpening System is a unique solution that holds the blade to be sharpened stationary and its angle constant while a diamond stone is guided across the cutting edge (at a 90°; angle to the tool's normal cutting direction) at either 25°;, 27.5°;, 30°; or 32.5°;, depending on your application, making the bevel flat and ...

coarse diamond, fine arkansas & serrated stone bars. ... Smith's Standard Precision Sharpening System offers an easy way to sharpen all types of knives . . . INCLUDING SERRATED. The fabric storage pouch makes this kit portable and easy to ...

With patience, this system does sharpen chisels, plane blades and other tools from 1/8" to 2-1/2" in width. If you're a total sharpening novice, this would provide a locked-in and repeatable setup to put a sharp edge on your blade. But for my \$85, I would choose an alternative sharpening system. - Glen D. Huey, senior editor

To use M-Power's Precision Sharpening System (PSS) guide, you hold the tool stationary while you slide the guide's head back and forth. This unique honing guide has an aluminum base with dovetailed ways that engage a weighted sled that slides side-to-side during honing. The sled is two-sided: One side is used to create a 25-degree primary ...
