What is monolithic power?

Monolithic Power Systems is an analog and mixed-signal chipmaker, specializing in power management solutions. The firm's mission is to reduce total energy consumption in end systems, and it serves the computing, automotive, industrial, communications, and consumer end markets. Monolithic Power uses a fabless manufacturing model, partnering with leading semiconductor manufacturers.

Is Monolithic Power Systems a disruptor in the power management chip market?

We think Monolithic Power Systems is a disruptor in the power management chip market, using its proprietary process technology to differentiate from larger competitors. In our view, electrical engineers tend to buy power management semiconductors from reputable, proven vendors that use leading-edge manufacturing.

Is MPS gaining traction in the power management market?

While MPS remains a small player in power management, we think revenue growth far above its largest competitors shows its differentiated approach to power management is gaining traction in the market. MPWR is trading at a 31% premium.

Monolithic Power Systems, Inc. was founded in 1997 by Michael Hsing, who is the current CEO. Prior to the founding of the corporation, Hsing worked as a Senior Silicon Technology Developer at several analog integrated circuit companies. The company then diversified into DC/DC products. In November 2004, Hsing took the company public with an IPO.
