How much does a solar inverter cost?

For an average-sized installation, inverters typically range between \$1000 and \$1500. That cost can go up quickly though as the installation gets bigger. Each year, the National Renewable Energy Lab performs a cost benchmark of the solar industry, looking at average installation costs, inverter and panel costs, and a host of other related topics.

Which solar inverter should I buy?

Every solar system needs some kind of inverter to convert sunlight into usable electricity. CNET experts have compared the most popular solar inverters' specs, warranties, prices and more. The SolarEdge Home Wave Inverter is our top pick in 2024.

Is a solar inverter a converter?

A solar inverter is really a converter, though the rules of physics say otherwise. A solar power inverter converts or inverts the direct current (DC) energy produced by a solar panel into Alternate Current (AC.) Most homes use AC rather than DC energy. DC energy is not safe to use in homes.

Are inverters cheap?

At around 6% of an installation's total cost, inverters aren't cheap so you need to make sure you're getting a good product before moving forward. And when you are talking with installers and receiving estimates, do some quick math to make sure all the costs add up.

Do solar inverters need to be replaced?

Odds are that sooner or later your inverter will need to be replaced. If you lease your installation or finance it through a power purchase agreement (PPA), just call up your solar installer and they'll come out and replace the inverter at no cost to you (since technically they own the installation).

What size solar inverter do I Need?

The size of the solar inverter you need will depend on the overall size of your solar panel system. For a typical residential solar panel system in the U.S., which is 5 kilowatts, most string inverters range between 3 and 7 kilowatts (kW).
