

Next era energy storage solutions

What is NextEra Energy Resources?

A renewable supply of energy. NextEra Energy Resources uses state-of-the-art energy storage systems that are safe and reliable. Here's how they work: A battery management system monitors the equipment to ensure safe, reliable transfer of energy.

What is NextEra's Energy Storage development programme?

NextEra said its energy storage development programme includes 1,322MW of large-scale battery storage ranging in size from 25MW to 230MW in various US states with signed long-term contracts and a commercial operation date (COD) in 2022.

What did NextEra Energy Resources add in Q2?

Of the 1.84GW NextEra Energy Resources added in the second quarter, roughly 1.45GW was new solar and 105MW was new energy storage. The clean energy business of NextEra also originated 310MW of solar-plus-storage facilities under its build-own-transfer unit, not included in the above additions.

What is energy storage?

Energy storage delivers advantages to the power grid and our customers. As the world's largest generator of wind and solar energy, NextEra Energy Resources has earned a reputation for excellence and best-in-class development skills. With our expertise, scale, size and scope of services, we have become a leader in energy storage.

What are the performance highlights for NextEra Energy?

Performance highlights for NextEra Energy include: Leading the world in wind, solar and battery storage energy- NextEra Energy is the world's largest generator of renewable energy from the wind and sun and a world leader in battery storage.

How many MW of storage will NextEra have?

Again, the majority of these are set to be battery plants with four-hours storage duration, with a small handful of three-hour and again a single two-hour project. NextEra said it expects to sign between 1,650MW and 2,000MW of storage during the 2021-2022 period in total and between 2,700MW and 4,300MW of storage contracts during 2023-2024.
