o PSC establishes 2030 Energy Storage Goal and actions ...

Energy Storage Roadmap. In June 2019, Governor Andrew M. Cuomo announced the state's plan to jump-start the development of energy storage in New York, calling for the deployment of 1.5 gigawatts (GW) by 2025. The New York State Public Service Commission (PSC) subsequently enhanced that goal by establishing a target of 3.0 GW by 2030. ...

New York Energy Storage Roadmap 2.0 Roadmap 2.0 was published just before the start of 2023, and it included six main proposals. Among those were plans to launch NYSEERDA-led solicitations for 4.7GW of storage across the utility-scale (defined in NYSEERDA parlance as "bulk storage" over 5MW), commercial and industrial (C& I) and community ...

The PSC order targets 3 GW of new utility-scale storage, 1.5 GW of new retail storage and 200 MW of new residential storage in addition to the 1.3 GW of storage assets already deployed in the state.

"Governor Hochul has long been a staunch supporter of energy storage development in New York State, and with her steadfast support, we have been able to develop this roadmap to guide New York away from fossil-burning power plants to a clean energy economy," added Public Service Commission chair Rory M. Christian. Roadmap details include:
