

# Pay as you go solar

What is a pay-as-you-go solar system?

In a "pay-as-you-go" (PAYG) business model, a company essentially rents consumers a solar home system that comes with a battery, a charge controller, a solar panel, LED bulbs and a mobile charger. Basic systems have enough power to charge phones and lights, and larger ones could power small appliances like radios or TVs.

How can I pay for solar power?

You can pay for solar power from Sun King in several ways: via your mobile phone, your Field Team agent, or in a nearby Sun King shop. Once you complete the installment payments, the product is yours to keep, and you'll enjoy free and efficient power for years to come.

Could pay-as-you-go solar bring affordable electricity to underserved people?

Without any other options, these citizens are forced to either go without power or use kerosene, an expensive and oftentimes dangerous fuel that pollutes the air and creates fire hazards. But there is a solution that could bring affordable electricity to unserved and underserved populations while growing the local economy: pay-as-you-go solar.

Why should you buy a solar product via PAYGO?

PAYGO offer the possibility to establish a track record of paid back credit. After the purchase via PAYGO of a solar product, the household not only has a good rating with financing institutions, but also a collateral to continue with the same (or similar) amount of instalments to buy other products.

How much does it cost to get solar installed?

Through Sun King Solar's Pay As You Go Financing, you can get solar installed for as little as \$0.22 per day with a small down payment. Pay it off in a year and enjoy free solar energy! Our experienced Field Team is ready to help you find the right product and guide you through the pay-as-you-go process. Our Field Team does it all!

Can you afford a solar system?

People can afford the small instalments and pay for their solar energy needs: Impact studies showed households using solar systems by Azuri benefit from significantly more hours of light and from the ability to charge phones at home.
