What is a protector series gaseous automatic backup generator?

Consider the Protector Series gaseous automatic backup generator line. These units powers essential appliances and modern technologies during power outages, allowing homeowners and their families to continue living life comfortably and without interruption. What Makes the Protector Series Such a Great Choice?

How does a Generac Guardian generator work?

Generac's Guardian Series generators provide the automatic backup power you need to protect your home and family during a power outage. Connected to your existing LP or natural gas fuel supply, it kicks in within seconds of sensing power loss--automatically--and runs for as long as necessary until utility power returns.

How often does a backup generator run a test?

All backup generators run a weekly test to ensure the system is running properly. Thanks to Quiet-Test, your Protector Series home generator runs its self-test at a lower, quieter RPM, which can be programmed to run weekly, bi-weekly, or monthly.

What makes Generac a reliable generator?

INNOVATIVE ENGINE DESIGN & RIGOROUS TESTING are at the heart of Generac's success in providing the most reliable generators possible. Generac's G-Force engine lineup offers added peace of mind and reliability for when it's needed the most.

Should you buy a larger portable generator?

"There's no need to go larger unless you want to be able to power more in a pinch and are comfortable with needing to keep more gas on hand," says Misha Kollontai, a Consumer Reports engineer with long experience in generator testing. Some of the larger portable generators in our ratings can burn through about 20 gallons of gasoline per day.

Are whole-house generators better than standby generators?

Whole-house generators offer many benefits over the typical standby generator. They feature larger, more powerful engines that are liquid-cooled for longer run times without maintenance, sophisticated programming for better load management, and provide better fuel options like natural gas, liquid propane, and diesel.
