Power Conversion System (PCS) failure. Thread starter Concestor0; Start date Jul 17, 2020; ... Tesla covers this under the 4 year B2B warranty, but not the 8 year "battery" warranty. The complaint would be that this should be covered as part of the battery, given it's inside the battery, it comes if you buy a battery, and Tesla claims the ...

You can also deliver more power over the same amount of conducting material on a 3 phase system (with 4 wires, the 3 hots plus a neutral) than you can over a split phase system. Tesla's OBCs in some countries actually can use all 3 phases, and the J3068 (Mennekes) connector supplies all 3 phases to a vehicle.

In April of 2022, car wouldn't start or respond. Towed to local Tesla Service site and needed the voltage controller replaced. Their response, must have been a bad part from the factory. June of 2022, same issue. Car wouldn't respond and towed again for service. This time, the Power Conversion System needed to be replaced.

I can say that the PCS was never a problem for the 6 years I drove my previous LEAF. I have noted that Hyundai covers their "batteries and system components for [...] all-electric vehicles with a 10-year/100,000-mile warranty." Do those "system components" include the Power Conversion System for Level 1 and 2 charging? I would like to think so ...
