

Power distribution cabinets

Custom made Kabledon distribution cabinets handle large amounts of power safely in the most demanding environments. Kabledon Distribution boards served as temporary power hub at the world's largest forestry fair.

ABB's power distribution units offer reliable and flexible power distribution solutions with almost unlimited configurations of panelboards and sub-feed breakers to meet most any load requirement.

The Cyberex PDU offers the most reliable and flexible power distribution product on the market today with almost unlimited configurations of panelboards, sub-feed breakers to meet every load requirement.

Safe and reliable electrical distribution. ABB cable distribution cabinets provide a robust and safe solution with uncompromised lifetime. They are designed for outdoor usage and verified to withstand external mechanical impacts according to IEC 61439, arctic climate.

Multiple standard cabinet designs are available to fit the footprint and access parameters for your data center needs. The Cyberex RPP Series provides the flexibility to expand your data center distribution capabilities.

Designed with a "true" fault-tolerant architecture, SuperSwitch 4 ensures there is truly no single point of failure through the use of our patented transfer algorithms and robust electrical components. With an increased MTBDE to an estimated 1.5 million hours, SuperSwitch 4 reliability is unmatched.
