

Qatar airways lithium ion batteries

Why is Qatar Airways a CeIV lithium battery certified airline?

Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Can a lithium battery be transported on Qatar Airways?

Standalone lithium batteries are allowed only with prior approval from QRDG team. COMAT may be transported despite QR imposed embargoes with prior approval from QRDG team. Your local Qatar Airways Cargo office is happy to advise you on all dangerous goods questions and escalate requests to QRDG team when necessary.

Which airline has a lithium battery certification?

Doha: Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to be certified globally. The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain.

Can lithium batteries improve air transport safety?

As a global network carrier and integrated group of aviation businesses the issues relate to both Qatar Airways and Qatar Airways Cargo principally, therefore driving greater awareness of the handling of Lithium batteries will help improve safety in the air transport industry.

What if a lithium battery is removed from a plane?

If the watt-hour rating (Wh) exceeds 100, prior approval from Qatar Airways is required. The removed lithium battery must be carried on board by the passenger and must remain inside carry-on baggage. All removed batteries must be properly packed in order to prevent short-circuiting or damage.

Can a lithium battery be carried by air?

Whether a lithium battery can be carried by air or not depends on its configuration and either watt-hour (Wh) rating, if it is rechargeable, or lithium content (LC), if it is non-rechargeable. Check the following table to find out if your battery can be carried in your baggage. Watt-Hour rating (Wh) or (Li content) Configuration
Hand baggage

Qatar Airways has become the second airline in the world to become IATA CEIV Lithium Battery certified and Qatar Aviation Services is the first ground handling company to ...

The reason these are treated cautiously is because they can catch fire if the lithium-ion battery cell charges too quickly or becomes damaged, and battery fires spread fast. ADVERTISEMENT

Qatar airways lithium ion batteries

Lithium batteries: Ensure all lithium batteries meet the UN Manual of Test and Criteria, Part III, subsection 38.3 standards for air transport. Note: Whether a lithium battery can be carried by air depends on its configuration ...

The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain. Both Qatar Airways and Qatar Aviation Services played a key role in the design and implementation of IATA's recent CEIV Lithium Battery program, and continue to be actively involved in its fine-tuning and adaption.

The two Qatar-based companies are the first in the world to receive IATA CEIV Lithium Battery certification, which aims to improve safety in handling and transportation of ...

Qatar Airways has become the second airline in the world to receive International Air Transport Association Center of Excellence for Independent Validators (IATA CEIV) ...

Qatar Airways is one of the leading airlines in the world and operates hundreds of flights every day. With the increasing use of portable electronic devices, the transportation of lithium batteries has become a major concern for airlines. As a result, Qatar Airways has established a lithium battery policy to ensure the safe transport of these batteries on their flights.

The certification aims to improve safety in handling and transportation of lithium batteries throughout the supply chain. Both Qatar Airways and Qatar Aviation Services played a key role in the design and implementation of IATA's recent CEIV Lithium Battery programme, and continue to be actively involved in its fine-tuning and adaption.

Qatar Airways Group chief executive Akbar Al Baker said: "Passenger and cargo safety is our utmost concern at all times, and we have continuously advocated for proper regulation in the transport of lithium batteries. ... There have also been 322 air/airport incidents registered from 2006 to May 2021 involving lithium-ion battery cargo of ...
