Renewable Energy comes from a source that never runs out. In other words, its source lasts forever. Renewable energy comes from natural sources that Mother Nature continuously replaces on a human timescale. The term contrasts with non-renewable energy, which comes from sources that eventually deplete.

Renewable energy is energy generated from natural sources that are replenished faster than they are used. Also known as clean energy, renewable energy sources include solar power, wind power, hydropower, geothermal energy and biomass. Most renewable energy sources produce zero carbon emissions and minimal air pollutants.
