

Replica 4130 movement energy storage

Is there a clone 4130 movement?

There are two clone 4130 movements: the original Dandong 4130 movement used by Noob (until Noob was shut down in a raid in 2021), and now used by CF, BTF, QF, and "new Noob". But in June 2023 Shanghai Movement factory released a version of the 4130 movement (called the SH4130).

What is a dd4130 movement?

Dandong 4130 (aka DD4130 or "Noob 4130") This movement is also known as the Noob4130 /N4130 /Dandong 4130. They are all the same. This movement is one of the highest quality replica movements available. For a long time it was exclusively available to Noob Factory.

Which Daytonas have a replica 4130?

The only Daytonas with the replicated 4130 are Noob, Clean, and Better Factories. These have a vertical clutch which makes them safe to run the chronograph all the time. It still causes undue wear and tear on the movement though. Everything else is a 7750 with seconds at 6:00 prone to breaking but is easy to source parts for.

Why is the Daytona 4130 not good?

The reason that this movement isn't great for the Daytona is because it is thicker than the 4130 movement, so the movement is often slimmed down (and thus made less reliable) to fit inside a 12.4mm thick Daytona case.

Can a clone 4130 be used with a 7750 rotor?

With the clone 4130 widely available, it's a good idea to avoid Daytonas with the 7750 movement. The 7750 can be identified by the single screw securing the rotor (red arrow), and the balance cock (green arrow) vs. the balance bridge see on the 4130. really wonderful guide!! @KJ2020 can you double check my GMT movements section.

Is the Rolex 4130 a genuine watch?

The 4130 movement is also compatible with genuine Rolex parts. It's common to replace the balance-complete, and the chronograph seconds wheel to build a movement that is nearly indistinguishable from the genuine Rolex caliber 4130.

If I'm reading it correctly, it looks like they have simply moved the regulator arm. If you are looking for a better clone movement, it would need to be a true free sprung with microstella adjustments. Based on the unknowns of this newer movement, I would take the safe bet and stick with the known 4130 used in the clean and others.

I doubt the usage of 904L but would be happy to be wrong. The so called 4130 clone (which in my eyes isn't a clone at all.. "s just another decorated asian movement...the SH3135 or the Yuki movement is a clone since it's

Replica 4130 movement energy storage

able to take gen parts!) is a downturn for me.

The biggest difference absolutely lies in the movement, Gold Factory uses a Dandong 4130 movement in this Daytona, while APS uses Shanghai 4130, I still prefer the Daytona with Dandong 4130 movement, because this movement has been tested to be very reliable for years, while Shanghai 4130 is still new to us, currently it is only installed by the ...

@wildrabbit, the reason I decided to replace the chronograph seconds wheel with the gen part is because I was interested to see if it would reduce stutter for the chronograph seconds hand. If you run the chronograph on the Dandong 4130 Daytona, the seconds counter (the large seconds hand in the middle that only runs when the chrono is engaged) will have a ...

Explore the captivating 4130 movement, an exquisite choice for watch enthusiasts. Available on AliExpress, you'll discover a diverse range of products, including the sh4130 movement, sa4130 movement, 4130 movement daytona, sa4130 movement, and movement 4130. Each piece features an impeccable mechanical mechanism, offering a perfect blend of style and functionality.

Many people might already know that Clean Factory is going to release their Daytona with super clone 4130 movement soon later in this month. And I received many messages and emails asking for info about this too. Some extra info I would like to share with you guys here about this new Daytona: 1. Dial will their own new made dial.

Presumably, the move towards the 4130 was due to the race to become 100% in-house - and possibly issues with servicing the Zenith-made 4030 caliber (for example: less parts). "This model has a new-generation self-winding chronograph movement - calibre 4130 - specially designed for the Cosmograph Daytona and entirely manufactured in-house.

I have the Rolex 4130 movement manual printed out with the code for each piece. thanks! Click to expand... You can go crazy with replacing 4130 parts with gen parts. Keep in mind this is just my preference - Autowind module (4130 145), chrono wheel (4130 820), ratchet wheel, stem (part 201), winding/sliding pinion (part 204 and 205), clutch and ...

V+F says that they are using Clean factory's bezel and dial, bracelet from ARF, and the DD4130 movement. You can browse on our website for the New Release : Daytona 116500 V+F DD4130. Search Results -> V+F 116500 DD4130 : ...

The only Daytonas with the replicated 4130 are Noob, Clean, and Better Factories. These have a vertical clutch which makes them safe to run the chronograph all the time. It still causes undue ...

The clone 4302 movement is new (as of summer 2022), but appears to be an excellent movement. The initial review by a watchsmith at RWI said that the movement is on par with the Noob Daytona 4130 movement (the 4130 Daytona movement is widely considered to be the best clone movement ever made, so this is VERY high praise). Like the genuine AP ...

Replica Watch General Discussion. Gen 4131 vs New SH4131. ... is the official release now! This SH4131 was built based on SH4130 and has 75h power reserve. Clean took part in the movement building with SH(Jinghe) ...

Of course, the price is also expensive. In order to let all of our watch lovers have a further understanding of the 4130 movement, so I specially made this popularization post. Clean has been using 4130 movement for about a year. Comparing to the previous 4130 movement from noob, the movement has been polished and other accessories have been ...

I agree with you, but OP seems quite determine to learn as he had explained his engineering background on his reply. I would also be cautious as I recently stuff up a 4130 movement myself when I dropped the setting wheel core inside the movement (face-palm). Luckily ado213 came to my rescue as usual and serviced the

Replica 4130 movement energy storage

watch for me.

The Shanghai 4131 is based on Shanghai 4130, it just has a different decoration on the movement plates and auto rotor that looks more beautiful than Shanghai 4130 and Dandong 4130. Is the new Daytona 126519LN worth buying? My opinion is just waiting, but Clean won't improve it and publish the V2 edition in a short period.

Guide When buying a high end replica watch, it's important to consider both what's on the outside and what's on the inside. The factories in China have invested millions of dollars in re-producing exact copies of various Swiss watch movements. ... Daytona Movements There are two clone 4130 movements: the original Dandong 4130 movement ...
