Saudi Arabia's energy minister on Monday said that the kingdom plans to invest 380 billion riyals (\$101 billion) in renewable energy projects and a further 142 billion riyals in energy ...

Saudi Arabia is a member of the Gulf Cooperation Council (GCC) countries, with an annual GDP of \$1,108,150 million [10] and also a country heavily relying on fossil fuels that results in large-scale CO₂ emission [7], [11]. According to Patalong [12], Saudi Arabia has set ambitious goals for renewable energy, hoping to reach 27.3 GW by 2024 and 58.7 GW by 2030.

Saudi Arabia's pivot to blue ammonia is part of its broader Vision 2030 reform agenda to reduce the Kingdom's reliance on fossil fuels and expand its renewable energy capacity. This transition is also critical to its commitment to combat climate change and contribute to global efforts to reduce carbon emissions.

Companies Will Also Focus on Deployment of Energy Vault's Transformative, New EVx Energy Storage Technology Within Aramco. LUGANO, Switzerland & DHAHRAN, Saudi Arabia--(BUSINESS WIRE)--Energy Vault, the creator of renewable energy storage products that are transforming the world's approach to utility-scale energy storage for grid resiliency, today ...
