Who is solar Panda?

Solar Panda is an innovative company providing home solar systems to rural African communities without access to electricity. Our loan-to-own model allows millions of families to have electricity for less than the daily cost of kerosene and mobile phone charging.

How much do solar panels cost?

This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt. The size of a solar panel system also plays a role in how much the installation will cost. Larger solar installations will typically have a lower cost per watt, because the panels can be purchased at a 'bulk price'.

How much do solar panels cost in Miami?

As of Jan 2024, the average cost of solar panels in Miami is \$2.66 per watt making a typical 6000 watt (6 kW) solar system \$11,169 after claiming the 30% federal solar tax credit now available. This is lower than the average price of residential solar power systems across the United States which is currently \$3.00 per watt.

Why should you buy a solar Panda kit?

Solar Panda offers competitive, affordable products. With payment options like daily payments or buying the product outright, Solar Panda kits save money while replacing harmful kerosene and costly mobile phone charging. Solar Panda's products are designed with the long-term in mind.

How much does solar cost per watt?

Most of the time, you'll see solar system costs listed as the cost per watt of solar installed so you can easily compare prices between quotes for different system sizes. The average cost per watt of solar is \$3.00 per watt, but you may get some quotes that are slightly higher or slightly lower than average. Beware of extremely low solar prices.

How much does a 5kw Solar System cost in Florida?

Most Florida homes require a 5kW or 6kW system, just below the national average. And remember, since each watt costs about \$2.65 before incentives and \$1.95 per watt after, each kW costs about \$2,650 and \$1,950 respectively.
