

Solar panel bird guard installation

Do solar panels need a Critter guard?

Solar critter guards keep your solar panels safe from nesting birds, squirrels, and raccoons that could chew through your wires. Vegetation like dry leaves or twigs that are swept under your panels can cause damage and become a fire risk - critter guards can help mitigate this possibility.

Are bird netting and Critter guards necessary for solar panels?

Because solar panels are installed with a gap between them and the roof for ventilation purposes, critter guards and bird netting can be installed to block squirrels and birds from getting under and between your panels and causing costly damage.

Do birds & squirrels damage solar panels?

Birds and squirrels can damage your solar setup in several ways, leading to unwanted repair costs and headaches. The easiest and most common solution to solar's animal problem is to install "critter guards," a physical barrier between your panels and your local wildlife. Here's what you should know about them.

How do I prevent birds from nesting on solar panels?

To prevent nesting birds and their droppings on solar panels, it's essential to use specialist stainless steel guards or bird exclusion products. Bird spikes and netting can effectively deter birds from accessing the spaces underneath solar panels, preventing them from nesting and causing damage.

How do I protect my solar panels from pigeons?

Protect your solar panels with galvanised solar mesh kits, a durable and effective solution to keep birds from nesting underneath. These kits provide a barrier that prevents pigeons and other birds from accessing the underside of the panels, helping to prevent damage and ensuring optimal functionality.

What are Defender's solar panel bird excluders?

Defender's Solar Panel Bird Excluders are stainless steel guards that effectively keep birds away from your solar panels without being visible from the ground. These guards prevent nesting, droppings, and damage caused by birds, keeping your panels clean and efficient.

Other popular areas we can cover are under eaves of your house and eaves of your patio covers. We can also put up bird spikes on chimneys. If you have solar panels on your home or business and a swimming pool or other water source nearby, we can virtually guarantee you have birds nesting under your panels.
