Because the pumps that run solar fountains don't use a huge amount of power, the solar panels on these fountains are usually fairly low wattage because that's all they need. Expect basic solar pumps to have solar panels of between 1 and 3 watts, and full solar fountains to have 5 to 15 watts. The greater the wattage, the more electricity it can ...

Solar fountains largely come in two types, external and internal panels. The external solar panel models have an external panel that you can position away from the fountain itself to get the best access to sunlight. The downside is the trailing cables. The internal solar panel models normally have the solar panel situated under the water ...
