

Solar panels in new york state

Updated Oct 22, 2024. You'll pay an average of \$14,615 to install a 5 kilowatt solar panel system in New York, before incentives. The federal investment tax credit (ITC) lowers that price by 30% of all your solar equipment and ...

The state of New York may not be known for having a high level of sunshine, but the state has excellent solar incentives and high electricity pricing -- both benefits when installing solar.

5 days ago; The average New York homeowner needs a 11.3 kW solar panel system to cover their electricity needs, which comes out to \$33,697 before incentives. Prices range from \$28,642 to \$38,752, but after the federal tax credit, that drops by 30%, and New York has some great local incentives as well. While this may sound high, it will pay off in New York.

According to research completed by Zillow, the average US home will increase in value by around 4.1% with solar panel installation. 3 Given the average home value in New York of \$729,936, that equates to an average value bump of around \$29,927, which more than makes up for the price most New Yorkers will pay for solar. 4 The bump in value could ...
